Season's greetings to one and all. The withdrawal of the monsoon signifies the beginning of the season of festivities. This is the season when everyone is excited about the festivals which are about to begin .Freshness is in environment and greenery all around. This is also the season of anxiety among Parents seeking admission for their children.

This year monsoon was deficient in our state. This may lead to a serious water scarcity in the latter part of the year. We can overcome a part of that problem by using the water sparingly and responsibly. Save water campaign needs to be carried out all over.

So with a hope and sincere wishes that the coming season of festivities bring a lot of joy ,health and wealth to all of us we bring you this fresh new Issue of our bulletin which is full of information with a Sprinkle of entertainment.

Dr Heena Shah Associate Professor

#### **OBESITY AND PREGNANCY**

Obesity as an abnormal growth of adipose tissue due to an enlargement of fat cell size fat cell number or both

Obesity is also expressed by bmi

BMI = weight/height

BMI more than 30kg/m 2 mean overweight half of female population over weight

Overweight women are more likely to suffer from infertility and lower chances of success with ivf/iui/icsi

Women during pregnency weighing over 90 kg may be labeled as obese

Obese women have more chances of pregnency complication to develope like gdm ,macrosomia ,pre eclampsia and also missed abortion cardio vascular complication ,thromboembolism perinatal mortality .

Risk during conduction of operative delivery

Risk of anaesthasia is also higher

During puerperium failure of lactation venous thrombosis embolism higher

## **EK SHAKHS**

Ek Shakhs hai jo mere khwab sajaye,
Kabhi ro bhi du na,to khud toot jaye,
Kabhi has du to aur khushiyan de jaye,
Kami mehsus karu, uske pehle hi rubaru ho jaye,
Hai ek sakhs jo aksar mere sare gum pee jaye,
Khwab toote to unhe umeedo se jodhke laye,
Umeed toote to naye raste bataye,
Raasta bhulu to ek mod par khada hoke manjil yaad karaye,
Hai ek sakhs jo mere sare khwabo ki jeemedari uthaye.

Har pal apna mere naam karke bhi, ek pal na ehsaan jataye, Galti karke bhi ruthu to bhi mujhe gale se lagaye, Jab kabhi ladhkhadu to koi ho na ho vo hath thame har kadam sath nibhaye, Ek shakhs sach mai hai aisa, jo chura chura k sari khushiyon ki lakir mere hatho mai sajaye,

> Jo mujhe udnaa sikhye, Ladna shikhaye, Gir k uthna sikhaye, Bhikhar jau to simatna shikhaye, Fisal jaun to sambhalna shikhaye,

Aankhe num hote hi hasake jaye,

Kabhi acchi to kabhi buri, Kabhi sacchi to kabhi jhoothi, Kabhi bholi to kabhi hoshiyaar,

Har rup mai mujhe apnaaye Sach mai keh rahi hu , hai aisi ek sakhsiyat jo mere "PAA" kehlaye Hai meri "MAA" jo mujhe har haal main gale lagaye......

Dr Purnima Patel
Associate Professor

#### **Rare Remedies**

- 1) Streptococcus Infection Ailanthus Glandulosa
- 2) Useful after operations on the eyes and teeth Alumen
- 3) Irritable feeling in finger nails better by biting it Ammonium Brom.
- 4) Convulsions immediately after delivery Amyl Nitrosum
- 5) Desire for alcoholoic drinks Asaram Europum.
- 6) Workmen develop hard places in their hands with cracks Cistus.
- 7)Recurrent tonsillitis with rheumatism Guaicum
- 8) Limits the duration of mumps Jaborandi
- 9) Crops of styes Lappa.
- 10) Valuable for Boys and girls whose voices are changing Manganum.
- 11) Flatus is passed continuously while walking Myrica cerifera
- 12)Palliative in tubercular Laryngitis Inula
- 13) It is an enemy to every kind of worm infesting the human body Chelone
- 14) Chemosis and Pterygium have been cured with it Guarea.
- 15) Best tonic for debility after exhausting diseases Avena sativa
- 16) Best tonic after exhausting fever Alstonia Scholaris.
- 17) Acts as a tonic to digestive functions and in early Tuberculosis Vanadium.
- 18) Explosive Headache of scholl teachers with frequent urination Scutellaria Lateriflora.
- 19) Nervous headache esp. in women <mental & physical exertion , shopping, when deviating from

ordinary pursuits, preceded by hunger – Epiphagus.

- 20)Cock's gait when walking, lifts feet higher than usual & puts down heel hard Heloderma
- 21) Must put arms on thighs, when coughing Niccolum
- 22) Anaphylactic states produced by proteins and enzymes Torula
- 23) Last stage of Cancer to ease pain Echinacea
- 24) Act as a tonic to ease appetite Gentiana Lutea
- 25) Lowers systolic and diastolic pressure Spartium Scoparium.

Dr Jigar Bhavsar
Associate Professor(Guest)

#### **Swine Flu**

#### Introduction:

It is a highly contagious respiratory disease caused by Infuenza virus H1N1 type Its outbreak started from 2009-2010 in India

Transmisssion:

Influenza virus from swine to Human transmitted through – Aerosol inhalation

Contact of infected Pigs

Contact of infected humans

**Incubation Period:** 

7-10 days

#### **Clinical presentation:**

Symptoms similar to seasonal Influenza like fever, cough, sore throat, bodyache, headache, chills & fatigue, vomiting & diarrhea.

In severe cases Breathlessness, High grade fever, altered sensorium & seizures may be experienced.

#### **Investigation:**

- 2) Blood Investigation: May show Neutropenia and Thrombocytopenia.
- 3) Chest X-Ray: Bilateral Opacity and changes of ARDSmay be seen.
- 4) Throat swab: For H1N1 antigen detection.
- 5) Arterial blood gas analysis: for changes of ARDS.

#### **Treatment:**

Supportive treatment & bed rest

Oral intake should be increased for hydration or I V fluids in hospitalized patients

Anti pyretics and Antiviral drugs for treatment and prophylaxis

Oxygen support, Bipap or Invasive Ventilation in cases of breathlessness as per severity.

#### **Prevention:**

- 1) Educate Community by the means of a Health care person or in News paper, Television & Radio.
- 2) In cases of Outbreak Face mask (N 95 must), for the patient & who are working with the patient or contact.
- 3) Vaccination.

Dr Charmi Thakkar
Assistant Professor

#### THE REPERTORY OF MIASM BY DR. R P PATEL - AN INTRODUCTION

Yes, this is the only repertory where in front of particular rubric, the miasm under which that rubric belong to is written and not the list of drugs of Materia Medica under which that particular rubric belongs to. The author has done the tedious job of classifying each symptom of Kent repertory to which miasm it belongs to and the best part is he has given the exact reference in each rubric the source information about classifying the miasm of that rubric, which makes this work most authentic and genius.

Full name of the book is "Chronic miasm in Homoeopathy and their cure with classification of their rubrics/symptoms in Dr. Kent repertory (Repertory of Miasm) By Dr. R P Patel.

#### **CONTENT: Total 8 chapters**

- 1. Preface
- 2. Introduction to chronic miasms
- 3. Psora and the miasm of Psora.
- 4. Sycosis and the miasm of Sycosis.
- 5. Syphilis and the miasm of Syphilis.
- 6. Human relationship and chronic miasms.
- 7. Cases and comments on miasmatic repertorisation.
- 8. Miasmatic classification of rubrics/symptoms in Dr. Kent's repertory( 6<sup>th</sup> Edition, corrected and revised by Dr. R P Patel)

REFERENCE: Here the author has used 33 reference, each given a particular code 1-9 and A to X

Example: B = Lectures on Homoeopathic Materia Medica by Dr J T Kent.

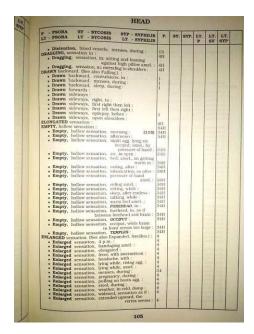

3 = Chronic disease, its cause and cure by Dr. P N Banerjee.

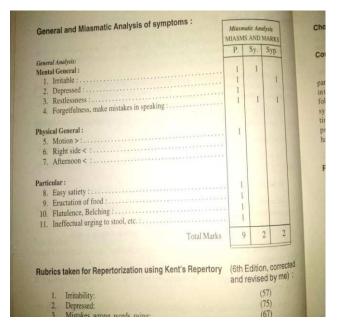

The book was published on 10<sup>th</sup> April 1996 and was dedicated to Dr. Hahnemann.

The author was diagnosed with fibro sarcoma on right forearm in 1960 for which he was operated three times and his whole right hand was amputed followed by which he again developed secondaries in lung. Than He has taken Thuja 10 M few doses and the secondariesfromlung disappeared from lungs and no reappearance of tumour again at any site till now. This led him to study theory of Chronic Miasm deeply and this book is the result of his than hard work.

He classified the rubric into Psora, sycosis, syphilis and their latent symptoms.

The whole repertory is divided into 2 main columns, on one side rubrics and sub rubrics are written and on other side seven small column are given, six for Psora(p), Sycosis(sy), Syphilis(syp), latent Psora(lt.p), latent sycosis(lt.sy), latent syphilis(lt.syp)and one small column is left blank in whole repertory so that user can classify rubric in his own way if he wish.

For working on this repertory, the physician or student has to write miasm against each symptom and give one mark and at end, one has to calculate marks obtained by each miasm.

#### **ADVANTAGE:**

- 1. To know which miasm is predominant in a case.
- 2. What miasmatic treatment to be given to follow a complete and perfect cure.
- 3. This repertory can be very helpful to students and beginners to diagnose the miasm of the case.

#### LIMITATION:

- 1. Miasm are not mentioned in many rubrics.
- 2. This repertory is not useful for systemic repertorisation.

## EVENTS

15.08.2018

72nd Independence Day was celebrated with much aplomb in SMMHMC campus with Patriotic Fervour in presence of The President Dr Keval Soni.

#### 16.08.2018 to 10.09.2018
